Crystalite Titanium

Our glassworks in Světlá nad Sázavou adds titanium to its glass melt to increase the durability of the glassware. As a result, our glasses are more resistant against mechanical defects and do not turn grey after multiple cycles in a dishwasher. Unlike other glassware producers, that recommend delicate dishwasher programs for their products, we guarantee the preservation of glass transparency even after the use of standard dishwasher programs. This innovation and the resulting quality have helped place Crystal BOHEMIA among the world's most successful glassware producers.

Ecological glass melt

The inclusion of titanium in our glass melt enables us to use an environmentally-friendly glass melting technique that does not contain lead compounds or any other heavy metals. Thanks to this unique method, we are able to implement fire polishing, a cutting-edge ecological glass polishing process that adheres to best available techniques (BAT) guidelines.

Branding

The gastro assortment is signed as standard.

Elegant and minimalist laser-cut „B“ sign with three stars based on the Crystal BOHEMIA landmark was newly developed not only for gastro segment purposes.

Gastro Packaging

There is a specially designed GASTRO packaging series for the assortment in this catalogue. The ordered glassware is delivered to you in a solid brown kraft box with a one-color print.

The New *Common* Brandmark

Tradition with a new modern touch

CRYSTAL
BOHEMIA

In 2020, Crystal BOHEMIA expanded to include Crystalite Bohemia, and therefore it was necessary to create not only a new common brandmark, but a whole visual identity.

We believe that combining the best elements from the two original brandmarks thus represents a symbolic combination of the best of both companies.
